***Kegel's Produce Taps Steton Quality Suite®  
To Streamline Quality Assurance Program***

*Automation Lightens Management Load*

**ST. GEORGE, UTAH — November 7, 2003** — Today Steton announced the addition of *Kegel's Produce* to the ranks of companies leveraging the power of the Steton Quality Suite (SQS), the leading mobile auditing software solution for quality assurance professionals. Based in Lancaster, Pennsylvania, Kegel's Produce has been providing high-quality produce to clients throughout the Northeast for more than 50 years.

“Upon discovering and investigating Steton, we found that a number of our customers are already using the Steton Quality Suite with great success,” stated Dave Manley, Kegel's Produce General Manager. “We are looking forward to being able to integrate our quality programs with those of our customers and share data directly. That helped solidify our decision to move forward with the Steton solution.”

To maintain the high quality Kegel's Produce customers have come to expect, the company has remained “lean and mean,” despite steady growth throughout its 50-year history. Their management strategy ensures that everyone in the business stays close to the customer. In order to do so, all key employees have assumed several different roles—an approach that leaves little time for shuffling paper and searching through file cabinets for audit data.

“In an organization where everyone wears a lot of hats, automation is a big plus,” stated Manley. “We no longer have to deal with file cabinets full of audit documentation.

It's now an easily searchable database that allows us to quickly and more effectively track trends.”

The bottom line for Kegel's Produce is the savings they are realizing in both time and money. The Steton Quality Suite allows them to continue their long-established pattern of steady growth without adding employees or more hours of their own time to manage their quality assurance programs. For more information about Kegel's Produce, please visit their website at [www.kegels.com](http://www.kegels.com).

“The Steton Quality Suite keeps critical function data in front of us at all times, enabling a more proactive management approach, stated Manley. “We found that for a company our size, it's the most efficient and cost-effective method for conducting audits.”

Steton is the leading developer of mobile auditing software for quality assurance and safety professionals. Our flagship products, *Steton Quality Suite*® and *Steton Safety Suite*™, automate the quality audit and safety inspection process, from mobile data collection to corrective action planning and trend analysis. Steton's products provide tremendous flexibility for use in all types of industries, and can be customized to meet the most demanding needs of any organization.
